

# SRG HEALTH LABS

"I love happy patients and always wanted to be in the health field helping others."

In October 2021, Sadeca Gullens' dream came true. SRG Health Labs is a full service drug screening lab for patients who need labs drawn, DNA testing, health screening panels, STD testing, pre-surgery labs and drug & alcohol testing. But what sets SRG apart is its commitment to quality care and minimum wait times.

"When I was pregnant and taking the kids to doctor appointments, we would often be there forever waiting for labs," says Sadeca. "So, I took the necessary classes and educated myself on what I needed to start my business. The patients love that we are available to service them without a long wait time and can go on with the rest of their day."

Proud to be Black-owned and offer 24/7 availability and parking, Sadeca hopes to bring her community clinic to other convenient locations and expand their services. What motivates her is to provide great care that is convenient for SRG's patients. With WWBIC's help, and their partner program, Kiva, she is doing just that. Through Kiva she received a \$4000 crowdfunding loan and has also benefited from WWBIC's invaluable training sessions.

"WWBIC has been so great with information and helping me sort through my business. They helped me put a great business plan together and also helped me with my Kiva process. They are so great and very helpful. I love WWBIC."

“ [WWBIC] helped me put a great business plan together and also helped me with my Kiva process. They are so great and very helpful.”
